

# OPENSUSE CONFERENCE

The Hague, Netherlands  
May 01-04, 2015

Brings together a wide variety of  
Free & Open Source contributors to  
collaborate on one of the major  
Linux distribution projects.

[conference.opensuse.org](http://conference.opensuse.org)

# Welcome to the openSUSE Conference 2015!

**On behalf of the openSUSE Community we warmly welcome you at our annual Geeko get together! We feel fortunate and proud to have been able to pull together a very diverse, intelligent and interesting bunch of speakers! We also have an excellent social program for you!**

Some of our personal open source heroes are among them, like Aaron Seigo who'll give a Keynote on Friday and Brenno de Winter who'll be speaking to us about the importance of free software for his work as a journalist.

During the conference we have some very special stuff like a lock-picking workshop and a selection of vintage gameconsoles! Also we have some special guests who'll predict your future by reading the cards and add some numerology into the social mix!

Friday, informal hangout at the venue, but if you want to go and explore The Hague, you're very welcome to do so as we've already warned cafe Rootz (city center, great beer selection) that they might be expecting a friendly Geeko invasion!

Saturday and Sunday we've got an all inclusive BBQ fest at the venue (say a big THANK YOU to our sponsors)!

Basically, you are your own host so help us to help you make a great social event! These are also the days that the presence of the Kolab Summit gives you the opportunity to go and explore even more interesting tracks, so be sure to take a peak at what our friendly neighbors are doing!

For more information about the City of The Hague, please take a look at the information brochure in your conference welcome bag, as this also includes practical information about interesting places, where and how to find medical aid and a city map.

The conference semi-official motto is "Flexibility through diversity" and all we need is some good spirits and open-mindedness from you as we are ready to welcome you all with open arms!

Have a lot of fun!

# Welcome to the Kolab Summit 2015!

On behalf of the organization of the Kolab Summit 2015 we warmly welcome you here in The Hague! As it is the first ever Kolab Summit we feel fortunate and proud to have been able to pull together a very diverse, intelligent and interesting bunch of speakers! We also have an excellent social program for you!

The program is looking absolutely awesome, with rock star open source speakers like Georg Creve, Aaron Seigo and Jeroen van Meeuwen standing side by side to well known (international) speakers like Brenno de Winter who'll be speaking to us about the importance of free software for his work as a journalist.

Saturday and Sunday we've got an all inclusive BBQ fest at the venue (say a big THANK YOU to our sponsors)! Basically, you are your own host so help us to help you make a great social event!

During the conference we have some very special stuff like a lock-picking workshop and a selection of vintage gameconsoles! Also we have some special guests who'll predict your future by reading the cards and add some numerology into the social mix!

During the Kolab Summit you can also enjoy the program of the openUSE conference which is taking place at the same venue and also has a very interesting program!

For more information about the City of The Hague, please take a look at the information brochure in your conference welcome bag, as this also includes practical information about interesting places, where and how to find medical aid and a city map.

All in all, we think we've got all the ingredients for making this an awesome first Kolab Summit and we are looking forward to meet you all!

Have a lot of fun!
